

The **PRO-TEC** System One is designed to monitor and protect the trailer and its contents using a built-in accelerometer and door pins. Any movement of the trailer or the opening of a door will trigger the alarm, causing the **electrical brakes to be applied, exterior siren to be sounded, and trailer running lights to flash**, hindering movement and alerting anyone nearby. **PRO-TEC** is proud to be the only alarm company that backs their equipment with a five-year warranty.

Features include:

Five Year Warranty
Optional Cellular/Paging
(May Save on Insurance Premiums)
All Hardware Included
Easy Installation

Trailer Alarms, LLC
301 Main Plaza #241
New Braunfels, TX 78130

A Product Of

TrailerAlarms, LLC
THE SECURITY POWERHOUSE

Optional Components

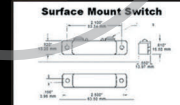

Part #MD-1 Interior Motion Sensor
Dual Technology with Microcontroller for False Alarm Immunity. The latest generation motion sensor uses two technologies (microwave and PIR) plus a microcontroller provides outstanding false alarm immunity without compromising detection.
Motion detector is to be used to sense motion inside the trailer, not the motion of the trailer.

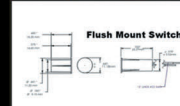

Part #KP-1 Keypad
• 100 unique 4-8 digit codes, 10,000 possible user code combinations.
• Stainless-steel face, durable and attractive.
• Easily delete individual codes.

Surface Mount Switch

Part #SM Surface Mount Switch
• Standard Gap: 1.0"
• Spacers, covers, and screws included.
• Automated gas-tight splice is soldered and epoxy covered to provide unequal electrical integrity and protection from corrosion and torque.
• White
SPDT: To be used as a normally open circuit for Pro-Tec System ONE.

Part #PF38 Flush Press Fit Switch
• Completely concealed for attractive installation.
• Standard Gap: 5/8" end to end, 3/4" parallel.
• 18" leads

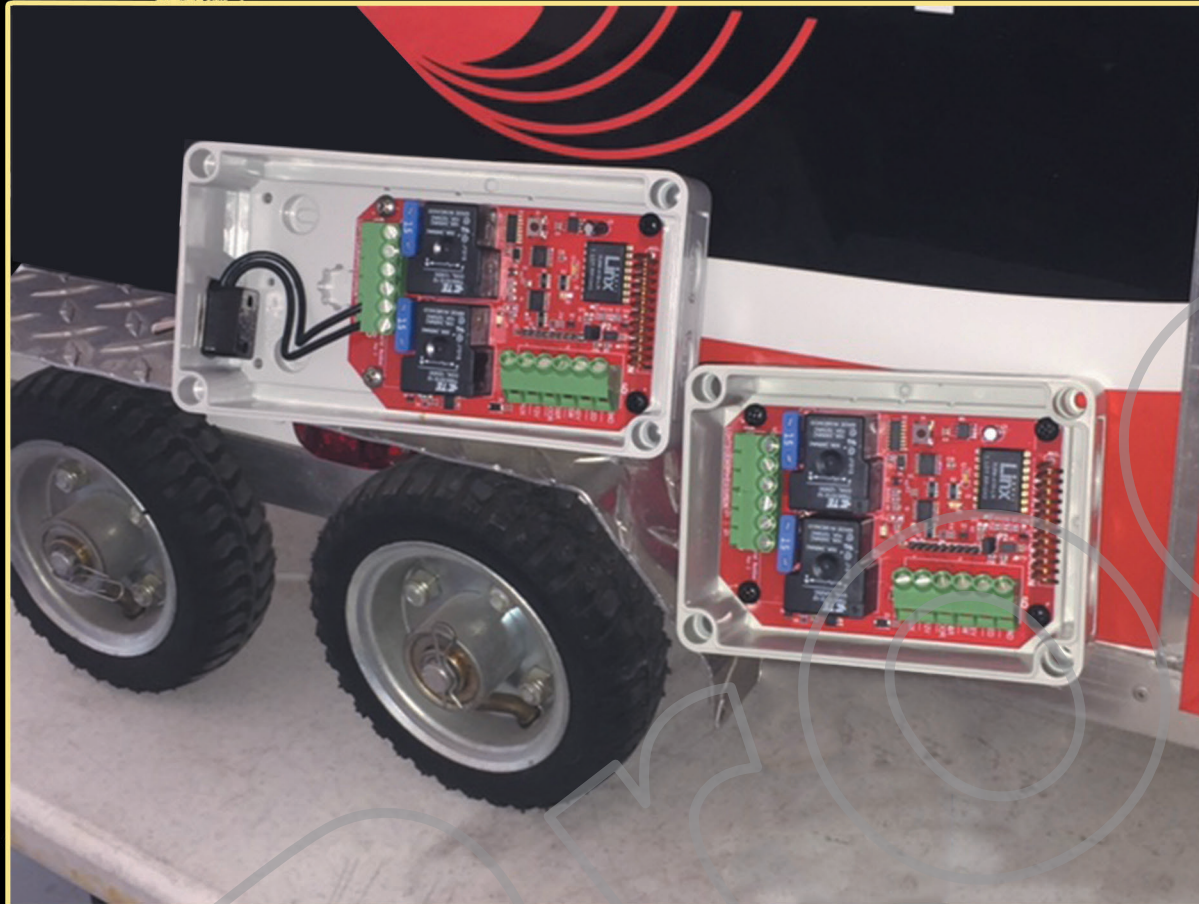

SPDT: To be used as a normally open circuit for Pro-Tec System ONE.

Part #KS-1 Key Switch
To arm or disarm alarm system.

Part #LED-1 LED Indicator
Indicates alarm status visually from outside of trailer.

Siren:

- Water Resistant
- 120+ dB Sound

Remote Transmitters:

- Key chain remote control units arm/disarm at a range of 200 feet. (Additional remotes available)

Brackets (3):

- Universal steel mounting bracket for pin switches.

Super Pin Switches (3):

- Polycarbonate Shafting
- Stainless Steel Spring
- Nickel-Plated Steel Body
- Tin-Plated Brass QC Terminal

(Optional)

Cellular/Paging System:

- Cellular notification now available through text or email. (Standard messaging rates may apply)
- Pager base unit will transmit in up to a half-mile radius when alarm or manual pager is activated.
